PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building responsive, user-focused web applications. Skilled in React, Next.js, TypeScript, and modern UI frameworks, with a proven track record of delivering production-ready solutions under tight deadlines. Experienced in collaborating with cross-functional teams, optimizing performance, and implementing scalable frontend patterns that improve efficiency. Passionate about problem-solving and transforming complex requirements into intuitive digital experiences.

WORK EXPERIENCE

Frontend Developer (Practice Projects & Self-Learning)

Self-Learning / Freelance — 2023

- Gained strong foundation in HTML, CSS, JavaScript and modern frontend concepts.
- Completed multiple practice projects to strengthen proficiency in React.js.
- Explored state management and scalable frontend patterns through hands-on coding.

Frontend Developer (Team Collaboration)

AdliKara — 2023–2025

- Built and maintained real-world applications using React.js and Next.js in a collaborative team environment.
- Developed responsive, user-friendly interfaces for diverse domains including healthcare booking platforms, e-commerce, ERP dashboards, and online services.
- Optimized frontend performance and implemented reusable components to accelerate feature development.
- Practiced version control (Git/GitHub) and Agile collaboration with backend developers, designers, and product teams.

TECHNICAL SKILLS

- Languages & Core Web: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend Frameworks/Libraries: React.js, Next.js
- UI Frameworks & Styling: Tailwind CSS, Material UI, Styled Components, Shadcn, Heroui, Chakra ui, Bootstrap
- State Management: Redux, React Query, Context API, Zustand, RTK Query
- Form Handling & Validation: React Hook Form, Formik, Yup, Zod
- Build & Tooling: Webpack, Vite npm
- Version Control & Collaboration: Git, GitHub
- Other Skills: RESTful APIs, Responsive Design, Performance Optimization, GraphQL

PROJECTS

Metallurgical Research Center Platform [github link](#)

February 23, 2025 - January 8, 2025

- This project, developed for the Metallurgy Research Center at Islamic Azad University, streamlines laboratory service management and bookings. Built with Next.js and TypeScript, it features a modern design using Tailwind CSS and Hero UI, enhanced with Framer Motion animations. Secure access is provided via OTP verification, while Tiptap supports blog content editing and Leaflet handles interactive map. Axios with GraphQL manages data, React Hook Form with Zod validates forms, and Zustand with TanStack Query ensures smooth state and data synchronization. Key functionalities include dual dashboards, equipment reservations, reporting, a captivating landing page, and full responsiveness across devices.

Slaughter Admin Dashboard [github link](#)

August 4, 2025, August 24, 2025

- Slaughter Admin Dashboard is an ERP admin dashboard for a slaughterhouse built with Next.js and Python/Django, providing comprehensive management of slaughterhouse operations. The system includes a professional admin dashboard, operational data management, advanced data visualization, and reporting, and leverages technologies such as React, Redux Toolkit with RTK Query, React Hook Form, hookform/resolvers, Zod, TailwindCSS, axios, react-hot-toast, and react-router-dom.

Laser Hair Removal Clinic [github link](#)

May 7, 2024 - Dec 2022

- Laser Hair Removal Clinic Platform built with Next.js, Redux, Chakra UI, Framer Motion, Formik, and Chart.js on the frontend, and Python, Django, and PostgreSQL on the backend. The system features two-factor authentication (OTP) for users, dedicated login pages for receptionists and admins, separate dashboards for clients, receptionists, and admins, along with integrated appointment booking, comprehensive reporting, advanced data visualization, and a fully responsive design.

Goldstore [github link](#)

Mar 1, 2025 - May 1, 2025

- The Gold Store platform is built with React, Vite, TypeScript, Python, Django (server-side), MUI, React Hook Form, Zod, Zustand, and TanStack Query. It offers secure OTP authentication, dual dashboards, comprehensive reporting, and a responsive design for melted gold trading.

fashara-shop(in-progress) [github link](#)

Jul 12, 2025 - Present

- Fashara Shop is a full-stack e-commerce platform built with Next.js, providing a complete and professional shopping experience. The system includes secure authentication with NextAuth and MongoDB, a dynamic product catalog with categories and filters, cart and checkout flow with validation, user-friendly dashboards for customers and admins, and a fully responsive design with animations and interactive components. It leverages technologies such as React, TailwindCSS, Radix UI, Zustand, React Hook Form, @hookform/resolvers, Zod, Embla Carousel, date-fns, stripe/react-stripe-js, and stripe.

EDUCATION

Bachelor's Degree in Computer Engineering

Oct 2021 - jun 2025

CERTIFICATIONS

JavaScript Programming i – Technical & Vocational Training Organization.
